The leader of the new  
generation of zirconia

**3Dpro-zir®**  
— More than nature —

## ADVANTAGES»»

1. Simple processing flow with high aesthetic effect.
2. High strength enough to make full arch easily.
3. Lower abrasion, easy to be polished.

## FEATURES »»

### Color

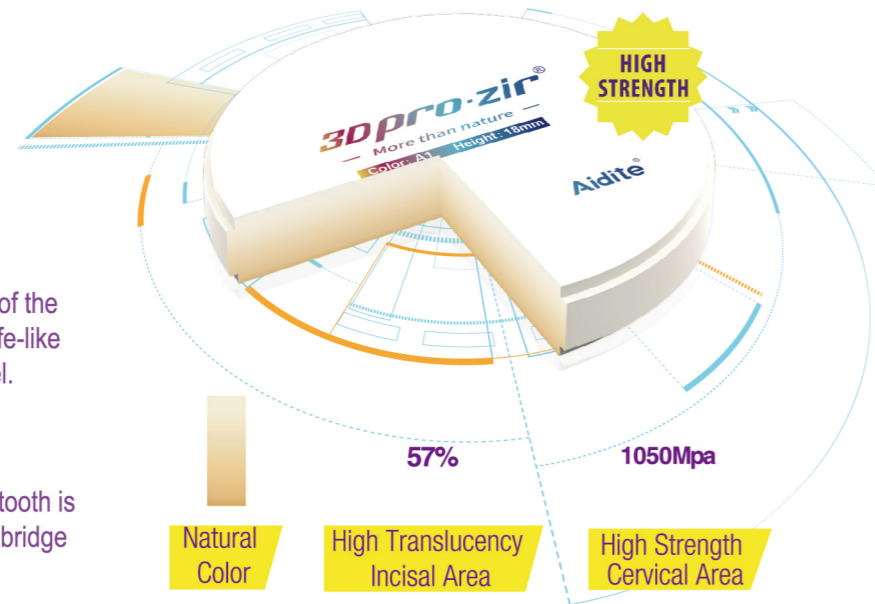

Excellent color effect after sintering, can perfectly match the natural tooth color effect.

### Transparency

The transparency of the incisal part of the tooth is as high as 57%, achieving life-like transparency of natural teeth enamel.

### Strength

The strength of the base part of the tooth is as high as 1050Mpa, realizing long bridge restoration.

## COLOR & SIZE»»

— More than nature —

“

For me, optimill 3D Pro is not another zirconia in the series of many, but has become the only zirconia in my lab today.

”
